## Technical Data

Operating Pressure PSI	3200
Water Volume L/min	10.6
Maximum water inlet Temp (°C)	40
Engine type	Honda GX 200 Petrol
Cylinder capacity (cc <sup>3</sup> )	200
Weight w/o accessories (kg)	33
Dimensions (L x W x H) (inch)	749 x 599 x 1054

## Details

We designed the G 3200 XH from the ground up with the most requested features, including convenient quick connect couplings for the high-pressure hose and a bonus storage area that allows you to conveniently store accessories and personal effects while you clean. The result is a pressure washer that is unmatched in quality and design. The G 3200 XH sports many industry-leading features, including an oversized detergent tank, a folding handle for easy storage and an ergonomic frame with 10" pneumatic tires and metal wheels. The G 3200 XH uses technology borrowed from our commercial products, including a commercial-grade pump with brass pump head developed exclusively by our German engineers. The G 3200 XH is also equipped with a reliable, easy to start Honda GX200 engine and a complete set of five patented Pro-Style nozzles. The folding handle makes it easy to lift and transport the unit. Tie down slots keep it anchored during transport. The closed position provides cage protection for both transport and storage. The G 3200 XH represents great value, offering German engineering, Honda reliability and a unique design that stands out from the crowd.
